yes ■ no

Q17**. What do you want to learn about helping and supporting children with ASD in distance learning?**

* I want to learn to work with children with ASD when they are not at school with verbal direction. Students should be able to do what I want and working without any assistance of their parents even 15 minutes.
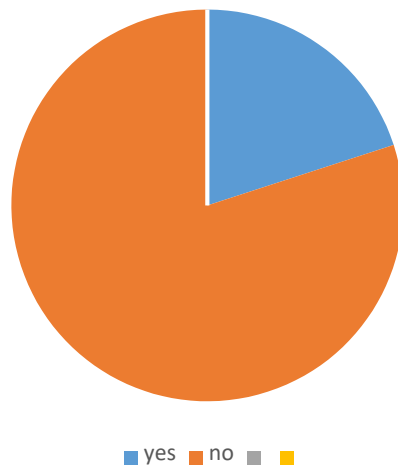

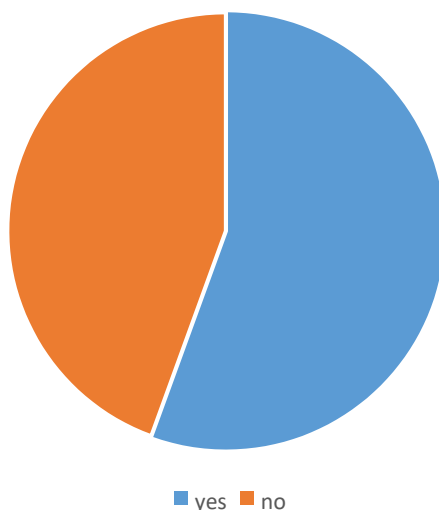

* I want to participate in traning that I will learn prepare some acitivites and application in digital platform. This tutorial must be according to level of my kids.

* I want to participate in traning that I will learn prepare some acitivites and application in digital platform. This tutorial must be according to level of my kids.

* I want to learn how I can communicate with kids in distance learning and I need to have some educational marterials that I can use in it.

* I need to learn how can control and communicate my students when we are on distance learning and we need tutorial programs that we can use it. I used educational iformation network (EBA) by deceloped our ministry of education bu I lıved big problems on working with my students. Because my students can do What I want and can work with me compatible.

* It is not easy to work with cihildren with ASD so I want join in a training about how I can do it

* I want to learn how I can work with parents, because parents helps to students when we do distance learning at home. Our students needs always help in distance learning

Q18. What do you think about an online course to improve digital skills of students with ASD as well as professionals working with them ?

- I think that It can be useful and benificial for me and for my colleaques.
- I think it will be great beacuse we all need this course
- ıt will be great.

19-Do the ASD student/people you work with have any basic digitals skills (swich on/off digital devices, using browser, etc) ?

■ yes ■ no
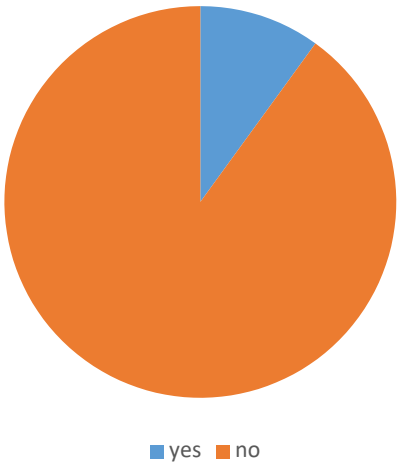

20-Do you often use digitals devices with students with ASD?

■ yes ■ no ■ ■
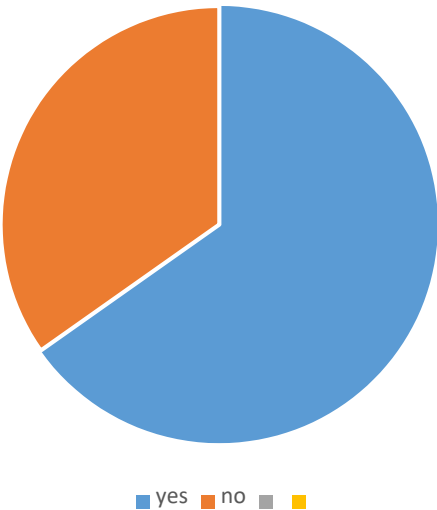

Q21. If yes, what kind of digital devices do you use with students with ASD?

- students like watching cartons and play games and they have some very simple ability like matching colors or numbers.
- we use computer when we need watching movie and cartons and listening music. We show kids to videos on youtube and on EBA (Education infromation network, developed by Turkısh ministry of education)
- Yes I do. I use computer when I teach students matching, colors, numbers, shape.
- computer, projection, laptop,

Q22. If not, what kind of tools do you often use with students with ASD?

- books, phone for watching video, listening music, cards with picture, puzzle, legos, wooden block.
- books, cards with picture, puzzles, toys, some educationals materials, legos
- educational metarials, books, toys, wooden bloks, puzzle, card with picture, PECS

Q23. Do you think that digital tools could improve your work with students with ASD?

All of the teachers is strongly agree and give answer YES.

Q24. If there is any, what is the biggest problem you encounter with students with ASD working with digital tools? With students with ASD in general?

- We need simple and basic educational tutorial but we dont have it. They can open or close computer but they can do our direction. we have to do many practice with kids very often and we need a digital device for each students.
- Our problem is we dont have enough digital tools. We only have a computer in every class and we dont have digital tutorial programs and games that studenst will like to do. If we have it, I am sure that most our kids will like to use it in their lesson.
- We need simple and basic educational tutorial but we dont have it. They can open or close computer but they can do our direction. we have to do many practice with kids very often and we need a digital device for each students.
- the biggest problem , they dont want to stop when lesson is end and some of my students can destroy to computer.
- when I was working on digital platform, ıf there are more stimulant, students can have difficulties to focus on lesson.

25- Do you think, as proffessional, you have enough digitals skills to support students with ASD?

Yes ■ no ■ ■
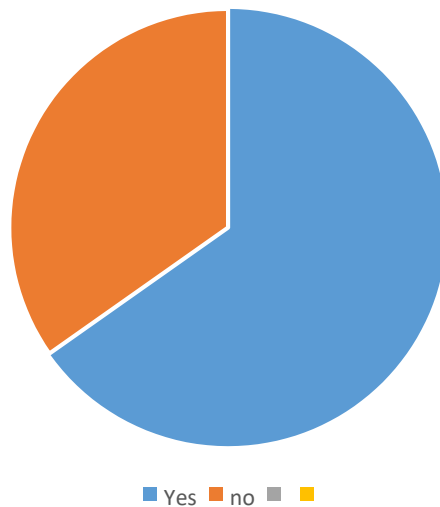

Q26. If not, what kind of digital skills do you think you need to better support students with ASD?

- I need to have a training about digital skills and online course for helping my kids. I never used like a educational method in my class. we use computer in our class for only watching cartons.
- I need to learn tranings about how I can prepare digital materials, like e book or game
